SUBJECT Soviet Photo and Research Office  
in Berlin  
25X1A6a

INFO. [REDACTED]

DIST. 25X1X6  
2 June 1947

PAGES

SUPPLEMENT

ORIGIN  
25X1X6

## SOURCE

1. A Soviet office, operating on the premises of a former German photographic reproduction firm in the Neue Bahnhofstrasse, Berlin, develops micro films and makes copies and enlargements of films of technical installations, devices, and drafts.
2. Also currently the office is concerned with evaluating and testing Magnetophon AG material. The latter firm formerly produced dictaphones and conducted research on high frequency and supersonic devices for AEG. During the war, Magnetophon is known to have made three developments: a radar ray detector, an apparatus to jam high frequency direction finders, and an imitation of the Kelvin hydrophone.
3. Approximately fifteen Soviet officers and five Soviet civilians at this office work in a department which is off limits to the fifty German male and female employees. A lieutenant colonel heads this special department and most of his subordinates are high-ranking air force officers. Security measures are said to be severe.
